

Chain-Sys Announces Its Participation at SAPHIRE® NOW to Showcase its Data Management Tools

LANSING, Mich. — 04/31/2016 — Chain-Sys, an SAP partner, today announced that it will participate at SAPHIRE® NOW and ASUG Annual Conference being held May 17–19 in Orlando, Florida. The Chain-Sys booth number is 938. Chain-Sys will announce the new appSECURITY™ product that enables enhanced identity and access management for SAP® software.

The following four Chain-Sys products are highlighted during the conference and exhibition.

appSECURITY™ offers enhanced identity and access management for SAP software. It facilitates easy onboarding of applications. Extensive audit trails allow tracing of who changed what, when in reconciliation/synchronization of security setups between SAP Identity Management and other enterprise applications. appSECURITY™ comes standard with streamlined integration features with source and target applications.

appCONNECT™ integrates SAP ERP and SAP Business Suite 4 SAP HANA® (SAP S/4HANA) with other cloud and on-premise applications. DQM Engine is built into the product. As cloud-based applications proliferate, data silos start building. This product helps in managing data across the multiple cloud applications and brings in summarized data to its central data hub, from which extensive analysis is done. Rapid integration is made possible with 200+ end points and 1000+ templates.

appMDM™ helps in rapidly building data hubs, without programming efforts. ETL operations, data governance workflow and data quality management are built into the product that can be easily configured. appMDM™ allows drag-and-drop development of user interfaces and business validations. Data profiling and data reconciliation are some of the advanced features that come with the product. This, along with the company's proven motto of "Get Clean; Stay Clean," provides consistent and stable master-data quality.

The field-proven appMIGRATE™ solution provides instant relief for data migration challenges. As a product with ready-to-use configurable templates (300+ for SAP software) with no need for programming, appMIGRATE™ helps save time and money. The tool provides a process flow that is amenable to implementation of data profiling, cleansing, coexistence, reconciliation and other DQM measures as part of data migration step. Predictable cutover planning for a tight time window can be accomplished way ahead of go live.

Chain-Sys will be providing demonstrations of the various tools, based on area of focus. The entire suite of products uses a templated approach (with 1000+ templates completed for different enterprise solutions & verticals) with prebuilt adapters, thereby reducing the time and effort in the implementation. This, with Chain-Sys deep expertise and agile methodology, make it a simple, predictable and favored approach to data- and security-related challenges.

“We are excited to release our newest product appSECURITY™ at SAPHIRE NOW to simplify customer SAP security needs. We look forward to be part of the data-quality initiatives of our customers,” said Sujay Nelson, Chain-Sys VP of Products for SAP.

In addition to having tools that truly deliver on the power of the cloud, Chain-Sys has experts to get customers connected quickly and aligned to best practices. These experts focus on data migration, integration, data quality and analytics. Their experience can be leveraged to speed cloud adoption while simultaneously helping ensure that there are no new data silos.

SAPHIRE NOW focuses on how companies can enable their digital business strategy and get more from their technology investments. SAPHIRE NOW and ASUG Annual Conference are the world’s premier business technology event and largest SAP customer-run conference, offering attendees the opportunity to learn and network with customers, SAP executives, partners and experts across the entire SAP ecosystem.

About Chain-Sys

Chain-Sys is a trusted innovator in the SAP software space. Our success can be largely attributed to our products, project/program management experience, industry and process knowledge and in-depth experience in the ERP product suites.
