CHAIN•SYS Products & Service
e•chain ERP Implementation

“e-chain enabled our company to go public. All our financial and manufacturing processes are streamlined with e-chain ERP/SCM suite. Our productivity has improved by 20% with e-chain on manufacturing and on-time delivery. Now we measure the margins and cost of goods sold accurately. We got the ROI within 6 months of our implementation with reduction of Inventory and inventory turns by 15%. e•chain Team deserves my greatest appreciation and thanks for your efforts. This will also go a long way for CHAIN•SYS as other GlassManufacturing companies will benefit from e-chain to use.”

Dheeraj Gada, Director,
Sezal Glass

Sezal Glass, one of the top 5 glass manufacturers in India, uses e•chain for their ERP.

Product Implemented

- e•chain provided Sezal Glass with a robust ERP/SCM solution capable of handling the specialized production environment in the glass manufacturing industry.
- Sezal chose the following modules to run their business environment:
 - Inventory
 - Procurement
 - Point of sale
 - General Ledger
 - Debtors Ledger
 - Cash Management
 - Fixed Assets
 - Taxes
 - Bills of material
 - Cost management
 - Shop floor management
 - Scheduling
 - Retail
 - Business Intelligence
 - Item Configurator
 - Configurator

Solution

The e•chain ERP/SCM Suite allowed Sezal to take advantage of automation across a number of Functional areas.

- e•chain *Procurement* allows Sezal Glass to streamline their acquisition process by issuing RFQs with multiple size details and to automatically convert their RFQs into POs. This saves significant processing time and eliminates double-entry of data.
- The company is now able to create pro-forma invoices through e•chain with detailed specifications.
- Sezal Glass can also create auto-generated sales orders against a pro-forma invoice including all necessary details of the glass pieces and all associated charges.
- On Sezal’s production floor, e•chain has reduced errors and saved time by automatically generating SFM Orders at the time of Sales Order booking.
- e•chain also processes all SFM Order transactions including Allocation, Inter/Intra work transfer and Product Completion against route card references with the glass size details included.
- Sezal Glass has also been able to automate its Shipping Invoice generation through e•chain, generating them from the Sales Order.
- e•chain *Finance* has brought automation to Sezal’s CL, DL, and GL transactions, saving valuable time for the finance team.
