

# Oracle Security Practice <sup>SM</sup>

Chain-Sys offers expertise in Security, Identity Management and Compliance for Oracle and other leading enterprise security solutions. Our experts can help support your data, application and infrastructure. Whether at the

database, application or integration layer, the Chain-Sys team has the industry and product experience to meet your financial, audit or government compliance needs. Security and Privacy Matters.

## The Chain-Sys Advantage

appSILHOUETTE Scrambling Technology

appAUGMENTER for SOX Compliance

AcceleratorTemplates for OIM applications onboarding

Proven support infrastructure and model

Delivery experience for Fortune 100e enterprises

## Offerings

### Identity Management

Primarily focusing on Oracle Identity Manager, we have expertise in implementing OIM, its integration with managed or validated systems, upgrades from prior releases or transitions from other enterprise identity management solutions.

Our Product and Services Include:

- Oracle Identity Manager
- Oracle Role Manager
- Oracle Identity Analytics
- Oracle Privileged Account Manager
- Password Management
- Request & Workflow-based Provisioning
- Role / Data-based Provisioning
- Role Management

### Integration with Oracle eBS and other Enterprise Solutions

Accelerating the integration of OIM and allowing the business to get a jumpstart on compliance and meeting their audit needs is a key component to many of today's heterogeneous environments. Our rapid on-boarding approach can be utilized in transitioning to a support model quickly.

Our Product and Services Include:

- Oracle Weblogic
- Oracle Fusion and ADF
- Oracle JAVA
- Chain-Sys appInterface
- Business Intelligence and Audit reporting

### Infrastructure Support (Directory Services, PKI/SSL, Middleware)

Building and maintaining environments to better support your applications.

### Access Management

We can show you how to leverage Single Sign-On within the enterprise and take advantage of Cloud and Managed Services. With recent changes utilize the OAM toolset with integration into OIM and Federation.

Our product and Services Include:

- Oracle Access Manager
- Oracle Identity Federation
- Oracle Web Services Manager
- Oracle Security Token Services

### Data Scrambling, Encryption and Masking

Installation and management of database encryption as well as deploying data scrambling technology. Both working together are designed to keep your data safe and offer protection from internal or external data breaches.

Our Product and Services Include:

- Oracle TDE
- Chain-Sys appSilhouette
- Chain-Sys appMigrate and appInterface
- Chain-Sys appAugmenter

### Governance, Risk, Compliance

Deployment of Oracle and Industry-leading GRC solutions. In addition, we have designed a solution alternative for meeting preventive controls using a configurable product.

Our Product and Services Include:

- Oracle GRC
- Chain-Sys AppAugmenter
